

C-30

MOISTURIZING CREAM WITH SPF-30

C-30 incorporates cutting edge technology to provide a moisturizing cream with an SPF 30 sun block that nourishes the skin, helps fight the effects of aging, the sun and environmental pollution. The C-30 cream contains active ingredients that help firm and tighten aging skin. C-30 increases the skin's elasticity by stimulating collagen production. The C-30 cream uses powerful anti-oxidant scavengers such as green tea extract, and stable Vitamin C, to remove damaging free radicals our skin is exposed to daily. For added skin protection, C-30 has a SPF30 that includes (Parsol ®) sun block to protect skin from UVA & UVB rays.

The C-30 cream features time release technology with encapsulated micro sponges to help the cream absorb into the skin. The micro sponges also absorb excess oils from the skin, making the C-30 cream an exceptional moisturizer for all skin types, while leaving a silky smooth feel as it goes onto your skin. The C-30 cream is rapidly absorbed into the skin, leaving no oily, or greasy residues.

C-30 \$29.95 in 1 oz jars
