

UPLIFT SERUM
A Botox Free Lifting Alternative
Targets Wrinkles and Helps Tighten Skin

A few drops is all you need. **UpLift** is a powerful anti-aging serum that is safe for all skin types. **UpLift** is rich in DMAE, peptides and moisturizing ingredients to hydrate the skin while smoothing fine lines and wrinkles. DMAE helps firm the skin by re-energizing facial muscles. Matrixyl and Argireline are two peptides that stimulate collagen production and act as a non-botox wrinkle relaxing agent to reduce and soften expression lines. Hyaluronic Acid adds skin hydration by helping skin retain moisture.

The serum can be applied directly to the skin and gently massaged into the tissue. Use the Derma Roller to enhance product penetration. Regular usage will promote the long term firming and tightening results from peptides that stimulate collagen and elastin production.

Available in 1 oz bottle: \$39.95
